

Repair and refurbishment of electronic components

Production delays and breakdowns are costly and can be prevented by the availability of suitable spare parts.

Production reliability guaranteed?

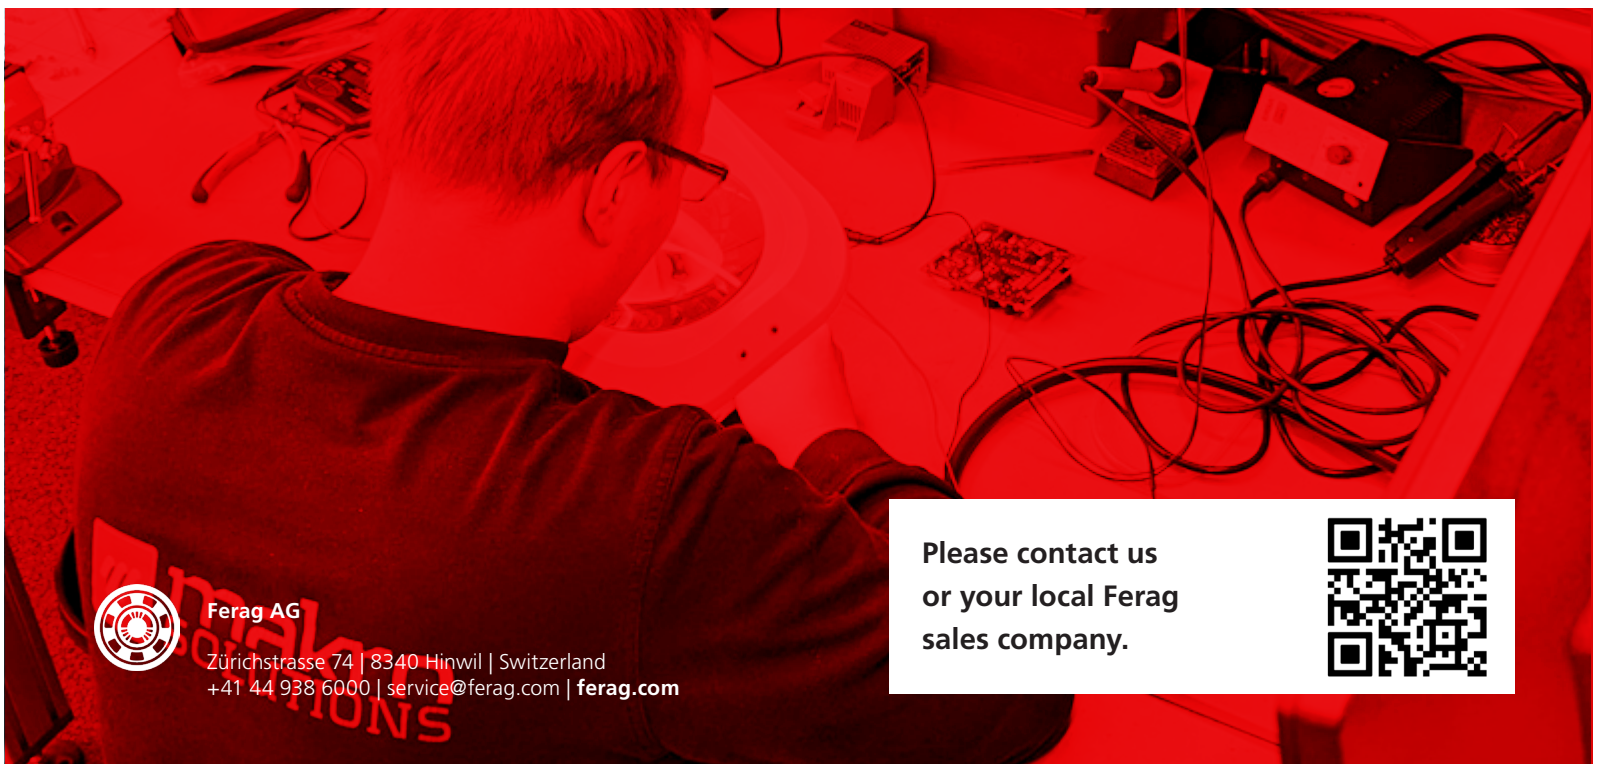

Our experienced specialists analyze the condition of the electronic components and look for a suitable solution for repair or refurbishment.

We are here for you

Request a non-binding quote for the repair of your components. After an inspection, you will receive a proposal for action. Thanks to our many years of experience, you benefit from our knowledge and expertise.

Your benefit is:

- Damaged components that can no longer be procured are repaired and refurbished for further use.
- Cost savings compared to new material
