f.

The ferag.rotapusher is the ideal solution for efficiently ejecting or transferring cartons, containers, and packages onto a conveyor or another transport system. Its rotary push function ensures controlled, safe, and material-friendly transfer.
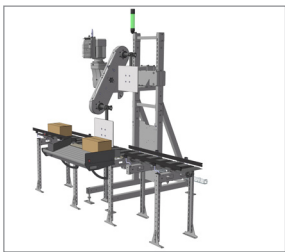

Your Benefits at a Glance:

• Robust design – Developed for reliable continuous operation with minimal maintenance

• Durable and low-wear – High-quality materials and precise manufacturing ensure a long lifespan

• High performance – Handles up to 60 packages per minute for smooth logistics flow

• Flexible use – Suitable for a wide range of package sizes and goods

• Precise control – Sensor integration for optimal positioning and secure detection

Technical Specifications:

|	
Module Dimensions (approx.)	L 905 x W 1.850 x H max. 2.750 mm
Max. Cycle Rate	60 Pakete/Min
Max. Conveyor Speed	bis 1,5 m/s
Supported Package Dimensions	• Length: 100 – 600 mm • Width: 100 – 400 mm • Height: 100 – 400 mm • Weight up to 30 kg
Power Supply	3x400 VAC (50-60 Hz)
Optional Sensors	• Product detection (photoelectric sensor or laser) • Distance measurement for precise positioning

**Integration Options** (The images shown depict example configurations)

Compatible with ferag.easychain

Compatible with ferag.deniway

Compatible with conveyor belts

The ferag.rotapusher is part of the ferag. modules portfolio, designed for minimal planning effort and quick deployment. Customers can receive a non-binding quote in just a few clicks and optimize their intralogistics processes efficiently.
