ferag.spiral
The Flexible and Reliable Spiral Conveyor

#perfectmatch

More information available online:

The ferag.spiral offers an effortless and efficient solution for overcoming height differences in your existing operating environment. Thanks to its modular expandability of up to 12 spirals, it reaches impressive heights of up to 12.2 meters, making it ideal for multi-level facilities and complex logistics systems.

Key Features at a Glance:

Conveyor Dimensions:	Maximum package size of 600 x 400 x 400 mm
Conveying Speed:	0.25 – 1 m/s (15 – 60 m/min)
Load Capacity:	Up to 20 kg/m or 5 kg per plate
Conveying Heights:	Expandable up to 12 spirals for heights ranging from 2.2 to 12.2 m
Adaptable and Easy to Configure:	Modular design enables seamless integration into various layouts and requirements.
High Conveying Capacity with Minimal Energy Consumption:	Rolling support ensures an energy-efficient, low-noise, and low-wear operation

Four Standardized Outputs

Enable flexible connection to existing infrastructures without additional adjustments.
