

Order Fulfilment Next Generation

Wave picking makes order fulfilment more efficient

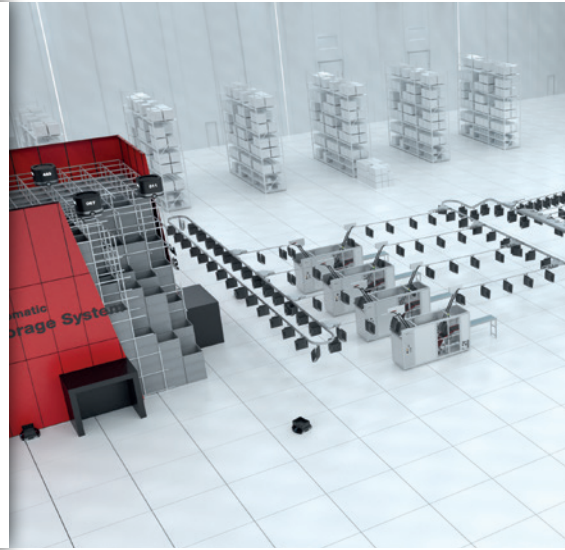

In particular, increasing product diversity (SKUs), more detailed order structures, accelerated delivery and return processes as well as constant cost pressure in e-commerce and retail present major challenges for service providers. As a response to the sharply increased demands of modern distribution centres, Ferag comes up with a unique order fulfilment solution: A combination of well-known storage systems and reliable Skyfall pouch sorter technology, also successfully proven for higher loads and product dimensions.
