

denisort®

Conveying, sorting and order picking in one system

Denisort is an innovative tilt-tray sorter that combines conveying, order picking and sorting in one seamless and scalable system with universal applications across a wide range of intra-logistic processes. The basis is a carrier chain that runs energy-efficiently and quietly on low-friction rollers in a steel profile. The system thus enables individual solutions with a completely free layout in all dimensions, even across several levels.

Applications

- Order picking for e-commerce, retail, B2B and 3PL
- Sorting for dispatch, restmail, incoming goods and returns
- Extending process chains with no need for transfer points

Technical data

Capacity	up to 12,000 trays/h
Speed	up to 1.35 m/s
Tray sizes	650 × 450 / 450 × 380 / 320 × 370 mm
Maximum loading	12 kg
Curve radii	1,500 mm
Inclination	up to 20°

Benefits

- Conveying, sorting and order picking in one system
- Also ideal for bulky, light, round or sensitive products
- 3D capability, also across several levels
- Multilevel for maximum capacity in the tightest of spaces
- Modular and extensible design
- Energy-efficient technology thanks to rolling friction
- Proven and robust engineering
- Cost-effective in operation, service and maintenance
- Low-noise

Peripherals / specifications

- Automatic or manual tray loading
- Identification by barcode, RFID, camera recognition
- Customised chutes
- Material flow controller (MFC) and visualisation
- Interfaces to WMS, WCS and peripheral systems

E-commerce sorting
Courier, postal items and restmail sorting
Fashion and footwear distribution
Mail-order book trade
Mail-order pharmacies
Traceability solutions
Photoprint dispatch
